Village of Pleasant Prairie Public Works
Water Utility Division
8600 Green Bay Rd., Pleasant Prairie, WI 53158
Phone: 262-925-6700

DIRECTIONS FOR COLLECTING A WATER SAMPLE

1. Use cold water faucet (NO SWIVEL OR SWING FAUCETS). Avoid Water Softener Faucet - if Possible.
2. Remove Any Screens Or Aerators from faucet.
3. Let cold water run 3 - 4 minutes.
4. Fill sterile water bottle to shoulder.
5. Replace cap securely. Be careful not to contaminate the sample. Keep fingers out of sample bottle, inside of cap and off bottle cap threads.
6. Keep sample refrigerated.

Please PRINT all portions of the other side of this form in BLACK INK, and return with water sample.

Return sample within 1 hour of collection to:
Pleasant Prairie Public Works, 8600 Green Bay Rd.
Tuesday through Thursday, 8:00 a.m. - 4:00 p.m.

Samples older than one hour will not be analyzed.

NO SAMPLES WILL BE ACCEPTED AFTER 4:00 P.M.
NO SAMPLES WILL BE ACCEPTED ON MONDAYS OR FRIDAYS OR THE DAY BEFORE A HOLIDAY.

Verbal report may be obtained by calling 925-6700 three business days after sample submission. A written report will be mailed.

The ONPG test is approved by the United States Environmental Protection Agency under the Federal Safe Drinking Water Act. ONPG represents the chemical used in the test, o-nitrophenyl-B-dGalactopyranoside, which reacts with coliform bacteria to form a visible yellow color. E-coli reacts with 4-methylumbelliferyl-B-d-glucuronide (MUG) to produce visible fluorescence under long wave ultraviolet light. By incorporating these chemicals along with growth broth in test tubes to be inoculated with the water sample, both total coliform and E. coli can be easily and accurately detected within 24 hours. The MUG test is only required to be performed if the ONPG test fails.

The results of the ONPG-MUG test are reported as either:
Positive; one or more bacteria present, (unsafe)
OR
Negative; coliform bacteria absent, (safe)
